SUMMARY

Recent B.Tech Computer Science and Engineering graduate (2026) specializing in full-stack web development. Skilled in building responsive, user-centric interfaces with React.js and Next.js, and scalable, database-driven back-end systems with Node.js, Express.js, MySQL and MongoDB. Built end-to-end applications, including an AI-powered resume analysis platform. Seeking an entry-level Software Developer role to apply strong technical fundamentals, write clean and maintainable code, and contribute to high-quality product delivery.

TECHNICAL SKILLS

- Web Application Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Node.js, Express.js, jQuery, REST APIs, responsive design
- Databases: MySQL, MongoDB, PostgreSQL, SQL
- Programming Languages: JavaScript, Python, C, C++, SQL
- Developer Tooling & Workflows: GitHub Copilot, Anthropic Claude, OpenAI API | Rapid Prototyping, Debugging, Automated Testing & Documentation
- Tools & Practices: Git, GitHub, Linux, Agile/Scrum, unit & integration testing, API integration, technical documentation
- Collaboration: requirement gathering, client/team coordination, cross-functional communication

PROFESSIONAL EXPERIENCE

Web Development Intern | *MakTal Technologies Pvt Ltd* **Jul 2026**

- Delivered the live business website drchiller.com, from design through deployment, during a 3-month internship.
- Gained hands-on skills in Next.js, React, responsive design, API integration, Git/GitHub and deployment.

Full Stack Web Development Certification | *Udemy* **Feb 2025**

- Built and deployed end-to-end web applications using HTML, CSS, React.js and backend frameworks, gaining hands-on exposure to client-server interaction, REST API integration, and deployment workflows.
- Worked with SQL and NoSQL databases (MySQL, MongoDB) to design schemas and manage data persistence, while practicing systematic debugging across the full stack.

Python & Machine Learning Trainee | *Genzee Technologies, Kochi, India* **Jul 2024**

- Completed an intensive 7-day technical internship covering Python and applied ML, following structured documentation to deliver accurate tasks and demonstrating fast onboarding to new tech stacks (e.g., PHP/Laravel).

PROJECTS

Dr. Chiller – Production HVAC Services & Lead Gen Platform | *Freelance*

- **Designed and developed** a live site (drchiller.com), responsive business website end-to-end, from UI design to production deployment.
- **Tech Stack used:** Next.js, React, JavaScript, HTML5, CSS3, REST APIs, Git/GitHub

Openly – AI-Powered E-Learning & Resume Analysis Platform

- **Developed** a full-stack, AI-driven web application integrating frontend, backend, and data layers to streamline programming education and career readiness.
- **Engineered** an automated resume analyser feature using modern AI tools, enabling users to receive instantaneous, data-backed feedback on resume formatting and keyword optimization.
- **Leveraged** cutting-edge AI prototyping and debugging tools to accelerate the development lifecycle, reducing feature deployment time.
- **Tech Stack used:** [e.g., React, Node.js, Python, PHP, OpenAI API, MongoDB]

Bus Booking & Tracking System

- **Designed and architected** a robust full-stack web application featuring secure seat reservation and seamless digital payment gateways.
- **Implemented** a high-performance data layer using MySQL to optimize schedule management and handle concurrent user booking requests smoothly.
- **Integrated** a real-time location tracking system to provide users with live updates on vehicle status and ETA.
- **Tech Stack used:** [e.g., JavaScript, PHP/Laravel, MySQL, Google Maps API]

EDUCATION

B Tech in Computer Science and Engineering | Nehru College of Engineering and Research Centre, Pampady | Graduated 2026 | **CGPA: 7.34 (First Class)**

Higher Secondary Education | Vivekodayam Boys Higher Secondary School | **87%**

SSLC | St. Thomas College HSS, Thrissur | **Full A+**

CERTIFICATIONS

Advanced Programming in Python • Full-Stack Web Development (Udemy) • Introduction to Data Science (Infosys) • Data Analytics Job Simulation (Deloitte) • Python Coding Challenge (Brototype) • Git/GitHub Foundation
